THE CONVERSATION PRISM

Brought to you by Brian Solis & JESS3

“Now, ultimately, this issue isn’t just about information freedom; it is about **what kind of world we want** and what kind of world we will inhabit. It’s about whether we live on a planet **with one internet, one global community, and a common body of knowledge that benefits and unites us all**, or a fragmented planet in which access to information and opportunity is dependent on where you live and the whims of censors.”

Secretary Clinton

“ The will of the people is the only legitimate foundation of any government, and to protect its free expression should be our first object. ”

Thomas Jefferson

Ideas are more powerful than guns.

“ We would not let our enemies have guns, why should we let them have ideas.”

Joseph Stalin

Chapter 1 Introduction: A Moment of Opportunity and Challenge

Information, knowledge, and culture are central to human freedom and human development. How they are produced and exchanged in our society critically affects the way we see the state of the world as it is and might be; who decides these questions; and how we, as societies and politics, come to understand what can and ought to be done. For more than 150 years, modern complex democracies have depended in large measure on an industrial information economy for these basic functions. In the past decade and a half, we have begun to see a radical change in the organization of information production. Enabled by technological change, we are beginning to see a series of economic, social, and cultural adaptations that make possible a radical transformation of how we make the information environment we occupy as autonomous individuals, citizens, and members of cultural and social groups. It seems passé today to speak of “the Internet revolution.” In some academic circles, it is positively naïve. But it should not be. The change brought about by the networked information environment is deep. It is structural. It goes to the very foundations of how liberal markets and liberal democracies have coevolved for almost two centuries.
